

Hydrogen Sulfide (H₂S) IDC Trainer

E-Recertification Application

MISSION STATEMENT

Eric Rosemann and Associates, LLC acquired the rights to continue this training program established by Frank Perry and Associates, Inc. on January 1, 2015. Although Frank Perry and Associates, Inc. is no longer directly associated with the content and delivery of this unique and world-renowned program, the training standards set by Frank Perry is now ERA's mission is to maintain the integrity, quality and intent to save lives by producing the best trainers in the world for this critical safety subject.

RECERTIFICATION PRINCIPLES

The ANSI Z-390 Standard requires Instructors to re-certify every three years since their completion of the original Instructor Developer Course (IDC). The purpose of such recertification is to review and/or update:

- ✓ changes in regulations and/or standards
- ✓ changes in technologies associated with H₂S
- ✓ skill sets in adult training techniques, theory, performance, etc.
- ✓ communication opportunities between IDC Trainers, Community and Regulators
- ✓ Instructor Development Course (IDC) materials

(ONLINE) ELECTRONIC RECERTIFICATION

It has been determined that the standards for recertification can be met by both the traditional 2.5 day full-classroom, live instructor-led recertification course (IDCR) and this new online recertification (e-recertification), which also has a live instructor-led element to meet the principles and intent of the recommended standard(s).

SYLLABUS – H₂S INSTRUCTOR DEVELOPER COURSE ELECTRONIC REFRESHER (eIDCR)
